Summary

Results-driven BCA student and backend developer specializing in Python, API architecture, and DevOps. Global open-source contributor (Hacktoberfest Top 500, GSSoC Top 150) with a proven track record of engineering scalable web applications and architecting highly downloaded libraries to solve complex, real-world problems.

Education

Galgotias University

Bachelor of Computer Applications (BCA); CGPA: 8.11

Noida, UP

2023 – 2026

Saraswati Vidya Mandir Khurja

Class XII (Intermediate) PCM: Board: CBSE; Grade: 73.4%

Khurja, UP

2022 – 2023

Technical Skills

Languages: Python (Advanced), JavaScript, Bash Scripting

Backend & Frameworks: FastAPI, Pandas, NumPy, Streamlit, Scikit-learn, NLP

Frontend: React.js, TailwindCSS, HTML, CSS, Bootstrap

Databases: MySQL, SQLAlchemy

Tools & OS: Linux, Docker, Git/GitHub, VS Code, Postman

Experience & Achievements

Global Open Source Contributor

Remote

Hacktoberfest 2025 & GirlScript Summer of Code (GSSoC)

Oct 2024 – Present

- **Hacktoberfest 2025:** Recognized globally as a **Top 500 Contributor** for delivering high-quality, impactful Python code.
- **GSSoC:** Ranked as a **Top 150 Contributor** in the 2024 Extended program; successfully selected again for the 2026 cohort.
- Collaborated directly with global maintainers to optimize backend logic, resolve complex bugs, and enhance project documentation.

Python Full Stack Developer Intern

Remote

EduSkills (Virtual Internship)

Jan 2026 – Mar 2026

- Developed a comprehensive full-stack e-commerce capstone project, integrating a FastAPI backend with a dynamic React frontend.
- Engineered robust REST APIs utilizing Python, Pydantic for strict data validation, and SQLAlchemy for efficient database integration.
- Implemented advanced React state management and applied modern deployment strategies for scalable applications.

Projects

Indpy - Indian Identity Validation Library | Python, Regex, PyTest

[Live on PyPI](#) | [GitHub](#)

- Architected and published an open-source Python library on PyPI, achieving over **4,100+ downloads** globally.
- Implemented official checksum algorithms (GSTIN Mod-36, Aadhaar Verhoeff) to ensure strict data integrity.
- Optimized backend validation logic using complex Regex, significantly reducing boilerplate code and improving performance.

Sentio AI-Powered E-commerce Review Analyzer | FastAPI, NLP, React

[View on GitHub](#)

- Engineered a robust backend pipeline utilizing Python and DistilBERT NLP to analyze customer sentiment and product trends.
- Developed a scalable API using FastAPI, while strategically leveraging AI LLMs to rapidly prototype the React/TypeScript frontend.
- Built a web scraping architecture with BeautifulSoup to extract and clean unstructured raw data.

Indian Heritage REST API | Python, FastAPI, API Design

[View on GitHub](#)

- Developed a high-performance public REST API providing structured access to a comprehensive dataset of cultural heritage sites.
- Designed efficient endpoints and backend routing using FastAPI to ensure rapid response times and optimal data delivery.
