Summary

Results-driven BCA student and Python Backend Developer specializing in API architecture, rigorous data validation, and open-source collaboration. Recognized as a top global contributor through Hacktoberfest and GSSoC, combining strong foundational engineering skills with a proven track record of architecting scalable web applications and highly downloaded Python libraries.

Education

Galgotias University <i>Bachelor of Computer Applications (BCA) — CGPA: 8.11</i>	2023 – 2026 Noida, UP
Saraswati Vidya Mandir Khurja <i>Class XII (Intermediate), PCM — CBSE: 73.4%</i>	2022 – 2023 Khurja, UP

Technical Skills

Languages: Python, JavaScript, Bash Scripting, SQL
Backend & Frameworks: FastAPI, Django, SQLAlchemy, Pydantic, Pandas, NumPy, NLP (DistilBERT)
Frontend: React.js, TailwindCSS, HTML, CSS, Bootstrap
Tools & OS: Linux, Docker, Git/GitHub, Postman, PyTest

Experience & Achievements

Global Open Source Contributor <i>Hacktoberfest 2025 & GirlScript Summer of Code (GSSoC)</i>	Oct 2024 – Present Remote
- Selected for the GSSoC 2026 cohort and ranked among the Top 150 Contributors in the 2024 Extended program. - Contributed to established repositories including SymPy and OpenLibrary, demonstrating the ability to navigate complex codebases and follow engineering standards. - Recognized globally as a Hacktoberfest Top 500 Contributor for delivering high-quality Python code, optimizing backend logic, and resolving complex bugs.	
Python Full Stack Developer Intern <i>EduSkills (Virtual Internship)</i>	Jan 2026 – Mar 2026 Remote
- Engineered robust REST APIs for an e-commerce capstone project using Python, Pydantic, and SQLAlchemy for strict validation and database integration. - Developed a dynamic React frontend with advanced state management integrated seamlessly with the FastAPI backend. - Applied modern deployment strategies to ensure scalability and high availability.	

Projects

Indpy – Indian Identity Validation Library <i>Python, Regex, PyTest</i>	 PyPI Open Source
- Architected and published an open-source Python library on PyPI with 4,100+ global downloads. - Implemented official checksum algorithms including GSTIN Mod-36 and Aadhaar Verhoeff for strict data integrity and compliance. - Optimized backend validation logic using advanced Regex patterns and comprehensive PyTest unit testing.	
Sentio – AI-Powered E-commerce Review Analyzer <i>Python, FastAPI, DistilBERT, React/TypeScript</i>	 GitHub AI/NLP Project
- Engineered a backend pipeline utilizing DistilBERT NLP to analyze customer sentiment and product trends from review data. - Built a custom scraping architecture using BeautifulSoup to clean and process raw review datasets. - Developed a scalable FastAPI service and rapidly prototyped the frontend using React and TypeScript.	
StyleOdds – AI-Powered E-Commerce Backend Architecture <i>Django, Stripe API, AI Integration</i>	 GitHub Backend Architecture
- Engineered a scalable Django-based e-commerce backend with modular architecture for managing complex product catalogs and transactional workflows. - Integrated Stripe API for secure payment processing, asynchronous webhook handling, and PCI-compliant transaction verification. - Architected backend controllers to support AI-powered Virtual Try-On pipelines, enabling scalable image data processing and future AI integrations.
